

Patient Level Costing

Are you considering how to meet NHS Improvement's Costing Transformation Programme (CTP) requirements?
We guarantee to identify at least £150,000 of clinical variation or your money back!

Our future-proof, cost-saving managed service could be the answer

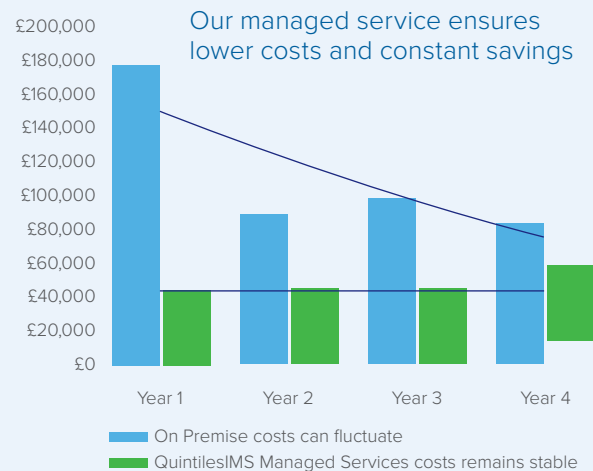

Like many NHS organisations in the wake of NHS Improvement’s Costing Transformation Programme, you may be looking afresh at your options for a Patient Level Information Costing System (PLICS). Implementing and maintaining patient-level costing can be expensive, time consuming and resource intensive and with new exacting standards for compliance to address, the challenges are growing.

QuintilesIMS can alleviate this burden. Our market leading capabilities ensure a best in class approach for meeting Monitor’s current and evolving requirements and providing the insights you need to improve your organisation’s performance at a fraction of the cost.

Realise significant savings

Ensure that you are fully compliant with CTP standards and significantly reduce your costs particularly in relation to:

- Software licenses and hardware
- Software support and maintenance
- Internal IT support
- Increased resource needs
- Change management
- External contractors
- Ongoing conformity with CTP standards

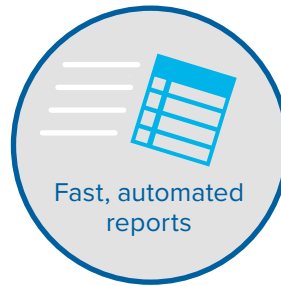

Focus on the insights – not the process

Entrust your PLICS to QuintilesIMS to:

- Release your existing resource, allowing your team to concentrate on gaining maximum value from the costing information
- Provide continuity and peace of mind, removing the worry of keeping pace with evolving requirements and the risk of data gaps and lost knowledge when costing staff leave
- Relieve you of the strain but leave you in control, with a service that is carefully handled, closely monitored and subject to your review and sign-off at every key stage of the process

What will QuintilesIMS deliver?

Consistent, high quality patient level costing data

Our managed service is your fast, cost-effective gateway to superior patient level costing information.

- **Timely, in-depth analysis and insights for a fraction of the cost** of maintaining PLICS in-house
- **Costing data that conforms** with CTP standards at all times
- **Quarterly** data collection, processing, validation and quality reporting, PLIC production and end-user reporting
- **Annual** reference costs, MAQs and assistance with annual costing audits
- **Data exports** for inclusion in NHS Improvement's CTP annual PLICS collection and PCB, the QuintilesIMS national benchmarking submission
- **Ongoing support** with clinical engagement

Fully tested technology infrastructure

The service is underpinned by a complete, fully-tested technology infrastructure that delivers to local and national requirements with speed and minimal resource while retaining a high quality, up-to-date, CTP-compliant costing model.

- Fully automated patient activity data ETL and validation process: import process linkable to a Trust data warehouse and over 37 data formats
- **Consistent PLICS production**
 - Fine grained costing to any level with 100% compliance with CTP guidance
 - Built-in cost reconciliation and audit reports for accurate, consistent results
- **MAQs score calculation**
- **End-user reporting based** on QlikView dashboard technology

“We definitely feel we made the right decision... with QuintilesIMS combining Healthcost and Albatross, I feel they are going to become the market leaders as they are so forward looking and seem passionate about NHS Costing. There is also a great user group consisting of some very knowledgeable costing practitioners from leading NHS Trusts”

Samantha Russell, Finance Manager, University Hospital Southampton NHS Foundation Trust

“On reflection looking back over the past 10 months, the Trust has definitely made the right decision to purchase the PLICS provided by QuintilesIMS for the following reasons: Value for money with no hidden additional costs; clinician friendly; quick and easy to upload data; QuintilesIMS team are experts in their field; and quick turnaround times to resolve or response to queries”

Karen Hansed, Divisional Director of Cancer and Diagnostic Services, The Queen Elizabeth Hospital, King's Lynn NHS Foundation Trust
