Building a diversion prevention program

With the growing drug diversion problem in hospitals and increased oversight from the DEA and FDA, it’s more important than ever that you have an effective drug diversion detection and prevention program in place. Through an evaluation of your current practices, BuzzeoPDMA’s hospital compliance experts can create a custom program designed to help you maintain compliance with 21 CFR Part 1300 to End regulations relating to security, records, orders, prescriptions, disposal, and return of controlled substances. Using elements of training, trending analysis, security and proper disposal, our programs combine the regulatory, operational & technology expertise of former DEA/ FDA officials and operational, pharmacy, and IT professionals. We identify areas requiring improvement, prioritize how you address these challenges, and implement process improvements for on-going management of the program.

Keep your organization safe without impacting patient care

Our compliance programs not only enhance your audit readiness, but they take into account patient needs and organization goals to keep you operating as efficiently as possible.

- Protect your organization with better abuse and diversion detection prevention programs.
- Meet regulations without impacting patient requirements and medical needs.
- Keep your administration and staff knowledgeable on current regulations.
- Conduct effective investigations in the event that you are faced with a diversion case.

Our two-pronged approach identifies areas requiring improvement, prioritizes how you address these challenges, and assists your staff and leaders with implementing process improvements and determine on-going management of the program.
Our comprehensive abuse and diversion prevention programs may consist of:

- Trending analysis of drug utilization
- Training analysis on drug utilization
- Tracking of drug utilization
- Analysis of and recommendations for your record keeping system
- Regulatory training for staff and administration
- Reporting requirements for theft and significant loss threshold
- Drug waste disposal

Why should you be confident we can help you?

- Regulatory and operational experts who sole focus on current diversion trends and regulatory compliance requirements
- Over 20 years of experience helping our clients manage compliance risk
- Solutions that have successfully withstood DEA and state reviews and audits
